Student Health Center

701 W. MONROE ST.
SALISBURY, NC 28144
Phone: 704-216-6111 Fax: 704-216-6770

Dear Perspective Student:

On behalf of the Health Services team we would like to welcome you to Livingstone College. This letter is an aid to help you get your health records completed and turned in **30 days prior to enrollment**. In the health packet there will be:

- **Demographics Page** contains the medical history for the student. All blanks should be filled in- including insurance status, along with a copy of the insurance card and drug allergy information. The student should fill in this portion; or a parent or guardian may do so if the student is under the age of 18.
- **Physical Examination Page** is the physical portion and is filled in by the physician. Your physical must have been completed within a 12 month period from enrollment. The physician may or may not perform a urinalysis or perform labs. It is dependent upon the health of the student.
- **Laboratory/Immunization Page**. Immunization records must be signed by a Physician or Nurse Practitioner including the address and phone number of the provider. For North Carolina students a high school transcript is not an acceptable record of immunization. Immunization records must be received on or before the student first registers for classes.
- **Meningococcal Vaccine Declination Page**. Complete the form, sign and check "A" if you do not wish to receive the vaccine.
- **Tuberculosis (TB) Screening Page**. TB screening tool must be completed by all students. An answer of ***yes*** to any question requires a TB skin test with results.

North Carolina State Law Immunization Requirements

Immunization requirements apply to all students **except** those residing off campus and registering for any combination of: off campus courses, evening courses (those which start after 5pm), weekend courses and taking no more than 4 credit hours in on campus courses. If at any time any of the above changes, the student needs to submit a certificate of immunization on or before the first date of registration.

- **Tetanus- DTP, DT, TD/TDap-** series of (3) doses. Under administrative rule **10A NCAC 41A.0401** those students entering a college or university for the first time after July 1, 2008 are required to have a booster dose of TDap (tetanus/diphtheria/acellular pertussis) within the past 10 years.
- **Polio**-a series of (3) doses. Not required if over the age of 18.
- **MMR** (measles, mumps and rubella) 2 doses.
- **Hepatitis B**-a series of 3 doses required for those students born 1994 and after. HepB Titers are not recognized by North Carolina Immunization Registry (NCIR)
- **Varicella Vaccine** – First dose required.

Recommended Immunizations

- Meningococcal-if student doesn't want to take vaccine, please sign the vaccine declination sheet.
- HPV
- Hepatitis A
- Varicella –Second dose
- Flu

If a student must begin a series of injections in order to be in compliance; such will be completed before the student can legally remain in college. Those students that do not turn in immunization

records prior to enrollment will be given 30 calendar days from the first day of registration in order to become compliant. If the immunization requires a series of doses and the period necessary to give the vaccine at standard intervals extends beyond the date of the first registration, the student shall be allowed to attend the college. **If after that time, they will be withdrawn from classes, will not be able to participate in sports and cannot live in the Residence Halls.**

The student health forms are located on the website of Livingstone College. Visit http;//www.livingstone.edu and click on "Students", scroll down to Student Web Portal, click Health Service, scroll to Student Health Information and click to download. You will see all the student health forms to complete. You may choose to bring your forms with you during registration or return your forms in advance any of the following methods:

MENINGOCOCCAL VACCINE WAIVER FORM

MUST BE COMPLETED AND SUBMITTED IF STUDENT DOES NOT RECEIVE VACCINE

MENINGOCOCCAL DISEASE (Meningitis) Meningococcal disease is a bacterial infection caused by the *Neisseria meningitidis*. The bacteria colonize in the inner lining of nasal passages. From there they can make their way into the bloodstream. If the bacteria multiply very quickly in the bloodstream this can lead to a severe blood infection called meningococcemia. The bacteria can also get carried to the brain and spine where they can attack the membranes covering the brain and spinal cord. These membranes are called meninges. This causes swelling. When this happens the disease is referred to as bacterial meningococcal meningitis. The disease is rare; however its initial flu-like symptoms make diagnosis difficult. Meningococcal bacteria are spread from person to person through close contact. The disease progresses rapidly and leads to death within 24-48 hours from the first sign of symptoms. Infants and adolescents are particularly vulnerable. Adolescents are at higher risk of contracting meningococcal disease because of several social and environmental factors such as: crowding, kissing, pubs/clubs, and residence halls. In the United States, the annual estimated incidence of meningococcal disease in adolescents and young adults (14-24 years old) was observed to be 0.75 cases per 100,000 individuals.

Vaccination is considered to be the most effective method of preventing meningococcal disease. A number of different vaccines are currently available for bacteria types A, C, W-135 and Y. Presently there is no vaccine available to protect against type B bacteria. In January 2011, the Advisory Committee on Immunization Practices (ACIP) recommended routine vaccination with a single dose vaccine for adolescents, optimally at age 11 or 12 years followed by revaccination at age 16 years, 5 years after the first dose received because there is a potential decline of immunity after 5 years.

Additional information can be obtained on the Centers for Disease Control and Prevention (CDC) website at: http://www.cdc.gov/health/diseases.htm.

Student Name (please print) Last_____First_____MI_____

Student ID number_____Date of Birth_____

If student is under the age of 18, parent or legal representative please sign:

Name:_____relation to student_____

I have read the information on meningococcal disease and:

(Mark either A or B)

A. I **DO NOT** wish to receive the meningococcal vaccine.

B. I have already received the vaccine on this date: _____.

Tuberculosis (TB) Screening Questionnaire (to be completed by incoming students)

Please answer the following questions:

Have you ever had close contact with persons known or suspected to have active TB disease? ❑ Yes ❑ No

Were you born in one of the countries or territories listed below that have a high incidence of active TB disease? (If yes, please CIRCLE the country, below) ❑ Yes ❑ No

Afghanistan
Algeria
Angola
Anguilla
Argentina
Armenia
Azerbaijan
Bangladesh
Belarus
Belize
Benin
Bhutan
Bolivia (Plurinational State of)
Bosnia and Herzegovina
Botswana
Brazil
Brunei Darussalam
Bulgaria
Burkina Faso

Source: World Health Organization Global Health Observatory, Tuberculosis Incidence 2015. Countries with incidence rates of ≥ 20 cases per 100,000 population. For future updates, refer to http://www.who.int/tb/country/en/.

Have you had frequent or prolonged visits* to one or more of the countries or territories listed above with a high prevalence of TB disease? (If yes, CHECK the countries or territories, above) ❑ Yes ❑ No

Have you been a resident and/or employee of high-risk congregate settings (e.g., correctional facilities, long-term care facilities, and homeless shelters)? ❑ Yes ❑ No

Have you been a volunteer or health care worker who served clients who are at increased risk for active TB disease? ❑ Yes ❑ No

Have you ever been a member of any of the following groups that may have an increased incidence of latent *M. tuberculosis* infection or active TB disease: medically underserved, low-income, or abusing drugs or alcohol? ❑ Yes ❑ No

If the answer is YES to any of the above questions, Livingstone College requires that you receive TB testing and results as soon as possible but at least prior to the start of the subsequent semester.

If the answer to all of the above questions is NO, no further testing or further action is required.

** The significance of the travel exposure should be discussed with a health care provider and evaluated.*
